6.9 Risk

- 1. Investors should realize that all investments in mutual funds and securities involve risk. It should be clearly understood that the portfolio of the Fund is subject to market fluctuations and risks inherent in all such investments. The value of the Units in the Fund may appreciate as well as depreciate as well as the level of dividend declared by the Fund may go down as well as up. Past performance does not necessarily indicate future performance. Therefore, before you invest in the Fund you should carefully evaluate the risks.**
2. The Fund offers a professionally managed allocation of assets among a broad range of underlying funds. By investing in a variety of underlying funds, the Fund's performance could benefit from the diversified returns of many types of securities.

3. The Fund's NAV and return will fluctuate with changes in the market value of the Fund's investments in underlying funds. When you sell Units, shares or certificates of underlying funds, they may be worth less than what you paid for them and, accordingly, you can lose money investing in this Fund. In addition, the performance of the Fund may be adversely affected because in allocating Fund assets among the underlying funds, the Management Company may consider the impact of the allocation decision on the underlying funds.
4. Some of the factors which add to the risk of the Fund include but are not limited to the following factors:
 - (a) **Market Risk:** The prices of and the income generated by the securities held by the Fund may decline in response to certain events, including those directly involving the collective investment funds whose securities are owned by the Fund, general economic and market conditions, regional or global economic instability, or currency and interest rate fluctuations.
 - (b) **Interest Rate Risk:** A rise in interest rates during the investment period may result in reduced prices of the held securities, thus reducing the overall return in terms of opportunity cost.
 - (c) **Sovereign Risk:** Payment of debt securities may be effected by the economic and political events in the country of the relevant issuer. The occurrence of a sovereign risk event could result in the loss of all or a portion of the principal invested, as a result of any economic or political circumstance.
 - (d) **Country or Political Risk:** The uncertainty of returns caused by the possibility of a major change in the political or economic environment of the country such as, but not restricted to, break down of law and order, war, terrorism, natural disasters and any governmental actions, legislative changes or court orders restraining payment of principal or income.
 - (e) **Government Regulation Risk:** The Fund's investments may be affected due to change in Government policies or regulations, which directly or indirectly affect the structure of the security in the Fund's portfolio or the entity issuing such security.
 - (f) **Portfolio Performance Risk:** A risk related to the uncertainty relating to the performance of the Fund with respect to its ability to earn consistent income stream. The NAV of the Fund might go down. Redemption Prices of the Fund Units shall be available on every Business Day.
 - (g) **Event Risk:** There may be adjustments to the performance of the Fund due to events such as market disruptions, mergers, nationalization, insolvency and changes in taxation law.
